 Requested Actions and Parking Lot Items

REQUESTED ACTION ITEMS	Assigned	Note
Workshop # 5 – October 16-17, 2012 – Requested Action Items		
FGW5.AI: 1) Survey of buyback transactions needed to determine the proportion of commingled and segregated purchases for each material type, by participant type. Also would like volumes associated with commingled/segregated purchases. The intent is to find the proportion of buyback transactions that are commingled or segregated.		
FGW5.AI: 2) E1B. Need analysis of impacts on CP SP CS if segregated only implemented at RC buy back.		
FGW5.AI: 3) E1. We need a public survey and/or industry survey to determine the public's approval or disapproval of not receiving 5 back for 5 in. Would the public tolerate a variance in the amounts paid in and out? See if there is existing studies or surveys that can be accessed without initiating new work.		
FGW5.AI: 4) 3A. Analysis of percentage reduction by material type to determine if a single rate is reasonable.		
FGW5.AI: 5) 3A. Identify sources of industry standards used for material shrinkage and analyze to current percentage reduction taken.
